Este es un problema observado en las válvulas que causa un mal funcionamiento en el inyector.

This is a problem noticed on the valves causing a malfunction in the injector.

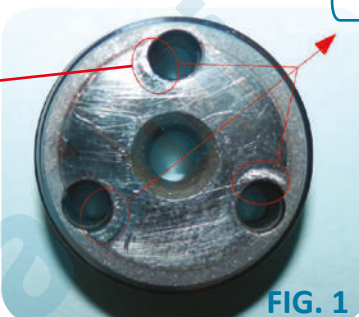

Desenroscando la ferula, podríamos crear en la cabeza de la válvula, como se muestra en la figura 1.

Unscrew in the ferrule, we could create some bulges on the valve's head, as shown in figure 1.

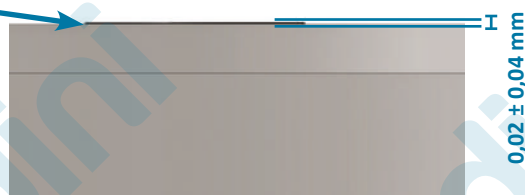

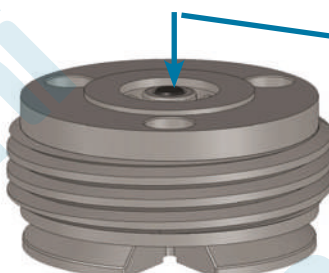

Bultos causados por desatornillar la ferula
Bulges caused by unscrewing the splint

Cuando la válvula esta montada, la media esfera sobresale $0,02 \pm 0,04$ mm de la tuerca.

When the valve is mounted, the half sphere should protude $0,02 \pm 0,04$ mm compared to the ferrule.

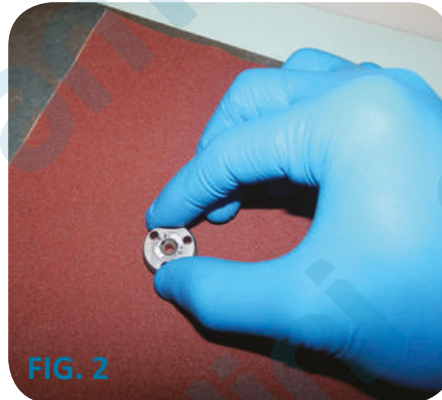

Los bultos comprometen el funcionamiento normal de las medias esferas, causando el mal funcionamiento de las válvulas y de su posible rotura.

Bulges compromess the normal function of the half sphere, causing a valve's malfunction and it's probably damage.

Para resolver el problema, recomendamos usar papel abrasivo para eliminar los bultos y restaurar el tamaño original colmo se muestra en la figura 2. (Recuerde realizar un pulido cruzado.)

To solve this problem we suggest to use an abrasive paper to eliminate the bilges and restore the original dimension as shown in figure 2. (Remember to make a crossing polishing)

Este debería de ser el resultado final, como se muestra en la figura 3.

This should be the final result, as shown in figure 3.

Otro problema causado por el desatornillamiento de la ferula, podría ser la deformación del diámetro interno de la misma. Esto puede causar una reducción en el diámetro del orificio, evitando el ensamblaje correcto de la válvula. Para resolver el problema, recomendamos rastaurar el tamaño original del orificio, ajustando el orificio a las medidas correspondientes: $3.50 + 0.01$ como se muestra en la figura 4.

Another problem caused by the ferule's unscrewing could be the ferule's deformation of internal diameter. this can causes a decrease in diametre of the hole, and prevents the proper assembly of the valve. To solve this problem we suggest to restore the original size, boring the hole with the relative measure, wich are $3.50 + 0.01$ as shown in figure 4.
